If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>1. The manuscript is important for the scientific community</p> <p>2. Suitable as adjusted by reviewer</p> <p>3. Comprehensive abstract</p> <p>4. Appropriate subsections but the writer can consider discussions of a table first then table 1 follows, discuss table 2 then the table follows and so on.</p> <p>5. Scientifically correct manuscript as long the writer take along corrections of stating the statistical software used for analysis as it would show validity of results (means plus standard errors)</p> <p>6. References ok but writer can improve on including latest like of 2019 and above from similar literature</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	Suitable language of communication but the write should pay more attention to details of words separation which I observed to be frequent. Maybe it was just typing errors from his/her side	
<p>Optional/General comments</p>	Writer should pay more attention to statistical presentation of data because you cannot leave tables with no data. Revisit the tables and confirm where there are gaps in them. Format your write up to font size of 12 as it's the standard
