

Editor's Comment:

The Authors' have improved the paper significantly according to the Reviewers' comments. In my opinion the paper could be published in Microbiology Research Journal International after making some following minor revisions: 1. In last paragraph on page 6 the statement "HEPATITIS vaccine" should be used instead of "HEPATITIS", 2. First words in the titles of table 1 and figure 1 should be upper case ones, 3. In 7th line on page 5 word "Descriptive" should be used instead of "descriptive", 4. In reference 17 the year of publication is lacking, 5. In reference 26 the first and last pages of the article are lacking.
