PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>The writing of articles is irregular and the literature used should be the most recent. This article does not provide a clear concept description and also does not provide a clear structure of the objectives of the research. There is no summary regarding each article keyword which is an important point of the review article. In review articles there must also be a future perspective.</p> <p>The structure of a good review article starts from the abstract, background, materials and methods (literature search strategy, revision of the search results, literature analysis), results and discussion, conclusions and future perspectives, references (maximum of the last 10 years).</p>	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> 1. Is language/English quality of the article suitable for scholarly communications? 	The use of grammar is still lacking in writing scientific articles
