

**Editor's Comment:**

Regarding the paper sent:

Interesting, because it deals with a specific transportation on water in the Lagos area.

1. No need to put in the frame the Abstract.
2. Where are the keywords?
3. Methodology is an apart chapter or part of the paper.
4. In the Conclusions (at plural) part, I think it would be feasible to make a comparison by figures between the same situation in the UK, or the US (this general approach was done at the beginning), that is by the measures to be taken, what is the improvement in Lagos transportation on water.
5. The lines between rows are not the same. It would be 1.5 spaces between the rows.

After, ok for publishing.
