I would strongly advise the consistency of result with discussion, like nothing reported on plasma therapy on the result part. I kindly suggest the author to correlate the conclusion with the result I would strongly advise the author to rewrite the citation properly Better to avoid the key word pandemic, positive and patients.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Need to improve the language</p>
