

**Editor's Comment:**

I checked all the attached files and I have only one remark and that is that the reviewer suggested to Cite and co-relate this recent reference regarding the changes in lymphocyte morphologically, resulting in atypical Lymphocytes "Suvvari, Tarun Kumar et al. "Hematological manifestations of Monkeypox virus (MPOX) and impact of human MPOX disease on blood donation - What we need to know?." New microbes and new infections vol. 52 (2023)."

The authors said that it was included in reference 5 but I couldn't find it among the references.

Otherwisel suggest to accept the article for publication after considering the point discussed above.
