

Review Form 1.7

Journal Name:	Journal of Geography, Environment and Earth Science International
Manuscript Number:	Ms_JGEESI_115885
Title of the Manuscript:	Examining Patterns and Trends of Change in Greater Yola, Adamawa State, Nigeria: A 10 Years Spatio-temporal Investigation
Type of the Article	

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>Manuscript holds significant importance for the scientific community. The research addresses relevant questions and provides valuable insights that have the potential to advance scientific understanding and inform future studies.</p> <p>Yes</p> <p>Yes</p> <p>Yes, it is well-structured</p> <p>Based on my evaluation, the manuscript appears to adhere to scientific standards.</p> <p>The references provided in the manuscript are not sufficiently comprehensive. There is a lack of in-text citations to support the claims made throughout the article, which weakens the credibility of the research. Kindly also revise the reference list with in-text citations as well.</p> <p>The discussion section lacks depth and fails to incorporate relevant scientific studies that could enhance the understanding of the findings. Additionally, the study does not address its limitations adequately. It would be beneficial to focus on keywords more relevant to the study's topic rather than biodiversity conservation to ensure alignment with the research objectives.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Yes</p>	
<p>Optional/General comments</p>	<p>None</p>
