

Editor's Comment:

After careful perusal on the revisions done by the author/s based on the comments of the reviewers, I hereby ACCEPT the paper for publication after considering the following items for revision:

Abstract - there were unnecessary, redundant words. For instance, 4th sentence: This research study take a look into a study of the effectiveness of ICT....

It is highly recommended that the manuscript undergo stylistics and editing and grammar checking.

Statistical tables - format according to APA. Normality tests may be discussed in the form of narrative, tables and graphs may be removed. Reliability results can also be discussed without tables.

In correlation table and regression analysis (model summary), spell out the variables in play, not just the acronyms.
