

Review Form 1.7

Journal Name:	Asian Food Science Journal
Manuscript Number:	Ms_AFSJ_116214
Title of the Manuscript:	Unveiling the Shifting Dietary Landscape: Plant-Based Foods Amidst the COVID-19 Era
Type of the Article	Review Article

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>Yes</p> <p>Yes</p> <p>Yes</p> <p>Yes</p> <p>Yes</p> <p>More references are required</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Yes</p>	
<p>Optional/General comments</p>	<p>The information provided in this article is useful for human awareness regarding their food habits and nutritional values for health point of view and simultaneously anticipated threats that are involved towards consumption of animal-based foods in the light of risk associated with covid-19 pandemic .</p> <p>Although the issues have been interestingly put forward in this article for benefits of plant based foods which can supplement diverse nutrition and boost immunity and protects infectious diseases , however it is not yet proved the various channels by which Coronavirus spread that has transmitted from animals to humans. Whether various vectors like bats, pangolin, or sea foods responsible for transmission of the corona virus are only based upon assumptions or scientifically proven facts. Because the place where first corona virus infection was reported in china, the people of such regions were largely consume animal-based food. Please discuss the scientific evidences of such zoonosis in the light of recent research reports available elsewhere.</p> <p>Whether animal virus can infect human being directly or is it the process of transformation that might has occurred before transmission to human cells.</p> <p>Whether suspected carriers of coronavirus were also detected in their system? If yes, Whether they are structurally similar? Please also discuss why human beings are vulnerable to be affected by animal viruses and not plant viruses. Linking to animal to animal and plant to animal with regards to virus transmission is important consideration. How human system act as barrier against plant virus.</p> <p>Please incorporate some of the queries that have been made for further improving</p>
