

Review Form 1.7

Journal Name:	Asian Journal of Education and Social Studies
Manuscript Number:	Ms_AJESS_116771
Title of the Manuscript:	Relationship Between Teacher professional development and Use for ICT in Teaching and Learning in Primary Schools in Sabuli Sub-County, Wajir County
Type of the Article	Original Research Article

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> Is the manuscript important for scientific community? (Please write few sentences on this manuscript) Is the title of the article suitable? (If not please suggest an alternative title) Is the abstract of the article comprehensive? Are subsections and structure of the manuscript appropriate? Do you think the manuscript is scientifically correct? Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<ol style="list-style-type: none"> The manuscript is significant for the scientific community, particularly in the field of education. It addresses an important issue regarding the utilization of information and communication technology (ICT) in primary schools in Kenya, specifically focusing on the relationship between teacher professional development (TPD) and ICT use. The title is suitable as it accurately reflects the focus and scope of the study. However, if you're looking for a more concise or catchy title, you might consider something like: "ICT Integration in Primary Education: The Role of Teacher Professional Development in Sabuli Sub-County, Wajir County" Yes, the abstract of the article is comprehensive. It provides a clear overview of the study, including the background, purpose, methodology, and key findings. It effectively communicates the importance of the study's topic and its relevance to the field of education. The subsections and structure of the manuscript appear to be appropriate for a research study. The author has clearly delineated different sections such as the objective of the study, literature review, research methodology, data analysis, and conclusion. Within these sections, you have further subdivided the content into relevant subsections, such as theoretical frameworks, empirical literature review, and data collection, which helps organize the information effectively. However, there are a few areas where you could improve the clarity and organization: -Clarity in Subsection Titles: Some subsection titles could be clearer and more descriptive. For example, instead of "Data Analysis," you could use a title that specifies the type of data analysis you conducted, such as "Quantitative Data Analysis." -Logical Flow: Ensure that there is a logical flow of information from one subsection to the next. Each subsection should build upon the previous one and lead the reader through the research process seamlessly. -Consistency in Terminology: Use consistent terminology and formatting throughout the manuscript. For example, if you use "teacher professional development" in one section, stick to that term rather than switching to "TPD" in another section. The author has clearly articulated the research objectives, reviewed relevant theoretical frameworks (Actor Network Theory and Theory of Acceptance and Use of Technology), and conducted a thorough literature review to support the study. The research methodology, including the use of quantitative analysis, sampling techniques, and data collection tools, seems appropriate for addressing the research questions. The statistical analyses conducted, such as the ANOVA and regression analysis, are standard methods for examining relationships between variables. Furthermore, conclusions are supported by the results of the data analysis, indicating a positive relationship between teacher professional development and the use of ICT in teaching and learning in primary schools. Overall, the manuscript appears to be scientifically correct based on the information provided. The author could enhance the article by incorporating recent references 	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> Is language/English quality of the article suitable for scholarly communications? 	<p>Yes</p>
