

### **Editor's Comment:**

As per my evaluation I accept this article for publication with below comments

**Relevance:** The topic of the study is relevant to the target audience, particularly small-scale aquaculture farmers in the specified region.

**Originality:** The research, examining whether the findings contribute new insights or knowledge to the field of aquaculture or related disciplines.

**Methodology:** Methodology section to ensure that the research methods employed are appropriate for the study objectives and provide valid results.

**Data Analysis:** The data analysis techniques used to analyse the proximate composition of the fish feed samples, ensuring they are sound and accurately reflect the composition of the samples.

**Clarity and Coherence:** The clarity and coherence of the article, ensuring that the writing is clear, concise, and organized in a logical manner.

**Implications for Practice:** The practical implications of the research findings for small-scale aquaculture farmers in Bobasi Sub-County, Kisii County, Kenya, and whether they are valuable for informing farming practices or policy decisions.

By considering these points, I am accepting the article for publication.
