

Editor's Comment:

The manuscript is poorly written and has received Major revision from 3 of the reviewers, however the peer review information shows as minor revision (7.7, 7 and 7 which are major revisions).

I didn't not see the changes requested by the reviewers in the revised manuscript.

My recommendations:

1. to rewrite the abstract
2. format the manuscript (do not use bold)
3. appropriate referencing
4. do not number the sections and group them into proper paragraphs.
- 5, do not write point form.
6. there is no proper sub sectioning
7. reference format is not acceptable

I believe the article in its current state is rejected and should be reviewed by at least one or more of the above reviewers.
