

Editor's Comment:

After thorough evaluation and consideration of the peer review feedback received for the manuscript entitled "Prevalence of Schistosomiasis among pupils of Umunya central School Oyi local Government Anambra State Nigeria," I recommend the manuscript for acceptance with minor revisions as indicated by the reviewers.

All reviewers agreed that the manuscript is significant for the scientific community as it addresses a prevalent health challenge, providing useful data for preventive measures in riverine areas affected by Schistosomiasis.

The manuscript's structure, title, and abstract were found to be appropriate and comprehensive, adequately reflecting the study's content and findings.

The manuscript is scientifically sound, with current and sufficient references that support the study's claims and methodology.

The language quality requires minor revisions to meet the publication standards. These corrections have been noted and addressed in the revised manuscript.

Reviewers suggesting minor revisions before publication.

The authors are requested to make the final language corrections as per the reviewers' suggestions to enhance clarity and readability.

In addition, I propose that we explore options for a comprehensive anti-plagiarism subscription to further enhance the manuscript vetting process. Implementing such a system would safeguard the integrity of submissions and align with our commitment to publishing original and high-quality research.

I look forward to your approval to proceed with the publication of this manuscript.
