

Review Form 1.7

Journal Name:	International Journal of Plant & Soil Science
Manuscript Number:	Ms_IJPSS_116781
Title of the Manuscript:	Effect of Recommended dose of fertilizer, Vermicompost and Zinc on Physico-Chemical Properties of Soil, Growth and Yield of Okra (<i>Abelmoschus esculentus</i> L.) var. Supper Green
Type of the Article	Scientific article.

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>Yes it is. In the article presented the influence of field production of okra vegetable, when using vermicompost, zinc and regular fertilizer. Okra is very popular vegetable in tropical and subtropical region, but especially in India with area of crop equal about 528 000 hectares.</p> <p>Yes it is.</p> <p>Yes it is.</p> <p>Section Conclusions can be improved providing Sub Sections with a description of the most important findings of the study.</p> <p>Yes it is.</p> <p>Please add some recent publications concerning the influence of vermicompost and zinc on okra production in tropical region.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>English language is good, but need some very small corrections.</p>	
<p>Optional/General comments</p>	<p>During the experiment physio-chemical properties of soil were evaluated. The study confirmed that vermicompost and zinc are beneficial for profitable crop of okra. So it can be introduced to farming practical utilization.</p>
