EDITORIAL COMMENT'S on revised paper (if any)	Authors' response to editor's comments
<ol style="list-style-type: none">1. the study results do not provide information about the significance of differences between groups.2. It is necessary to supplement the manuscript with this data!3. Reduce similarity index below 20%	<ol style="list-style-type: none">1. After reviewing our analysis, we would like to reaffirm that we conducted a t-test to compare the antioxidant activity between the % inhibition of gallic acid and the secondary metabolites of endophytic bacteria in mangosteen. The resulting significance value was found to be 0.013 ($P < 0.05$), indicating a statistically significant difference between the two groups.2. The interpretation of the significance test result has been included in the manuscript.3. The similarity score has been lowered to below 20%
