

## Review Form 1.7

Journal Name:	Asian Journal of Research and Reports in Gastroenterology
Manuscript Number:	Ms_AJRRGA_112142
Title of the Manuscript:	Ileo-ileal intussusception secondary to a lipoma
Type of the Article	Case study

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajrrga.com/index.php/AJRRGA/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><b>Compulsory</b> REVISION comments</p> <p>1. <b>Is the manuscript important for scientific community?</b> (Please write few sentences on this manuscript)</p> <p>2. <b>Is the title of the article suitable?</b> (If not please suggest an alternative title)</p> <p>3. <b>Is the abstract of the article comprehensive?</b></p> <p>4. <b>Are subsections and structure of the manuscript appropriate?</b></p> <p>5. <b>Do you think the manuscript is scientifically correct?</b></p> <p>6. <b>Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</b></p> <p><b>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</b></p>	<p>1. The importance of this article for the scientific community lies in the fact that as it is a case of intestinal obstruction due to intestinal intussusception in an adult, a rare and difficult entity to diagnose, it provides visibility to this pathology so that it can be considered in the differential diagnosis in cases of nonspecific intercurrent abdominal pain.</p> <p>2. Yes, but it could be interesting to clarify in the title that the clinical case concerns an adult due to its infrequent appearance at these ages.</p> <p>3. Yes, it is comprehensive.</p> <p>4. Yes, the subsections and structure of the paper are appropriate.</p> <p>5. Yes, the article is scientifically correct, but with non-recent bibliographical references.</p> <p>6. As I mentioned in the previous section, it would be interesting to have recent bibliographical references, only the first is current.</p>	
<p><b>Minor</b> REVISION comments</p> <p>1. <b>Is language/English quality of the article suitable for scholarly communications?</b></p>	<p>1. Yes, it is.</p>	
<p><b>Optional/General</b> comments</p>
