

Review Form 1.7

Journal Name:	Asian Journal of Immunology
Manuscript Number:	Ms_AJI_115805
Title of the Manuscript:	Iguratimod: Bridging Hope for Arthritis Patients through the Dual Power of Immunomodulation and Anti-inflammation- A Review
Type of the Article	

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>The manuscript is scientifically important but the authors should have mention the ethical approval of the study and expand the material and method of the study (patients selection, inclusion and exclusion criteria, methodology of investigation, etc)</p> <p>Yes</p> <p>yes</p> <p>yes</p> <p>I think the authors should mention the references for the pictures or mention in the text if pictures are original. In chapter 2.1. the sentence <i>Research has extensively documented the anti-inflammatory, analgesic, and antipyretic properties of Igratimod in diverse animal models.</i> should have reference. In chapter 2.1. the sentence <i>In the regulation of neutrophils, it has been discovered that Igratimod suppressed the expression of CPs by downregulating PAD in neutrophils from RA patients</i> should have reference In chapter 2.1. the sentences <i>Igratimod, at an optimal concentration comparable to MTX and dexamethasone, effectively hinders the expression of citrulline proteins in neutrophils from RA patients. This inhibitory effect is attributed to the downregulation of peptidyl arginine deiminase, shedding light on the mechanism of Igratimod in RA treatment</i> should have references. In chapter 2.2 the sentence <i>In subsequent clinical trials, it was noted that iguratimod exhibited favorable therapeutic outcomes concerning both clinical symptoms and biological markers, including rheumatoid factor (RF) levels and immunoglobulin concentrations in plasma</i> should have reference In chapter 2.2 the sentence <i>In cultures of murine B-cells, iguratimod exhibited a notable reduction in IgM production and the isotype-switch to IgG1 class induced by lipopolysaccharide (LPS) and/or IL-4</i> should have reference</p> <p>Also spelling and grammar should be checked.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Minor revision</p>	
<p>Optional/General comments</p>		

Review Form 1.7

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
