

**Review Form 1.7**

Journal Name:	<b>Asian Research Journal of Agriculture</b>
Manuscript Number:	<b>Ms_ARJA_116314</b>
Title of the Manuscript:	<b>A study on Medicinal plants diversification and their role on livelihood development in the Nilgiris</b>
Type of the Article	<b>Original Research Article</b>

## Review Form 1.7

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><b>Compulsory</b> REVISION comments</p> <p>1. <b>Is the manuscript important for scientific community?</b> (Please write few sentences on this manuscript)</p> <p>2. <b>Is the title of the article suitable?</b> (If not please suggest an alternative title)</p> <p>3. <b>Is the abstract of the article comprehensive?</b></p> <p>4. <b>Are subsections and structure of the manuscript appropriate?</b></p> <p>5. <b>Do you think the manuscript is scientifically correct?</b></p> <p>6. <b>Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</b></p> <p><b>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</b></p>	<p>yes</p> <p>yes</p> <p>yes</p> <p>yes</p> <p>yes</p> <p>yes</p>	
<p><b>Minor</b> REVISION comments</p> <p>1. <b>Is language/English quality of the article suitable for scholarly communications?</b></p>	<p>yes</p>	
<p><b>Optional/General</b> comments</p>	<p>Today, worldwide, we are witnessing a revolution in medical thinking and practice, where an appreciable role is also represented by the high level of scientific research and the superior utilization of medicinal plants, materialized by the manufacture of products that contain active principles in their formula.</p> <p>Since the need for raw material is continuously increasing, it could not be ensured only from the spontaneous flora, and it gradually moved to the cultivation of an appreciable number of medicinal species.</p> <p>The results of the research are estimated to be valid in the medium and long term by choosing some species of medicinal and aromatic plants that contribute to maintaining the balance of agroecosystems, to preserve biodiversity, ensure livelihoods, and increase the income of the tribal population in the state of Tamil Nadu, India.</p> <p>The orientation of therapy towards natural remedies, especially those of vegetable origin, is increasingly noticeable worldwide, determining the increased development of the production of medicines based on active principles extracted from plants.</p> <p>Large companies producing food supplements require very large quantities of medicinal plants. In order to be able to meet such a demand, it is necessary to have some agricultural holdings in this field where the production is carried out according to the norms of the European recommendations. The application of the results will have a positive influence on both producers and the environment.</p> <p>This article provides information on the importance of medicinal plants for biodiversity conservation and long-term benefits. It provides information to both researchers and farmers and deserves to be published..</p>
