

Review Form 1.7

Journal Name:	Asian Journal of Case Reports in Surgery
Manuscript Number:	Ms_AJCRS_116947
Title of the Manuscript:	Ileocecal intussusception caused by appendiceal mucinous neoplasm
Type of the Article	Case report

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> Is the manuscript important for scientific community? (Please write few sentences on this manuscript) Is the title of the article suitable? (If not please suggest an alternative title) Is the abstract of the article comprehensive? Are subsections and structure of the manuscript appropriate? Do you think the manuscript is scientifically correct? Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>The manuscript presents an interesting and rare case of ileocecal intussusception caused by an appendiceal mucinous neoplasm. It provides a detailed description of the clinical presentation, diagnostic workup, surgical management, and follow-up of this uncommon condition. The case report highlights the importance of considering underlying pathologies, particularly neoplastic lesions, as potential causes of intussusception in adults. Additionally, it discusses the challenges associated with the diagnosis and management of low-grade appendiceal mucinous neoplasms (LAMN). Overall, this manuscript offers valuable insights and contributes to the scientific literature on rare gastrointestinal conditions.</p> <p>The title "Ileocecal intussusception caused by appendiceal mucinous neoplasm" accurately reflects the content of the case report and is suitable.</p> <p>The abstract is comprehensive. It provides a concise overview of the case, including the presentation, diagnostic findings, surgical intervention, pathological results, and follow-up. The abstract effectively summarizes the key aspects of the case report.</p> <p>The subsections and structure of the manuscript are appropriate. It follows the conventional structure of a case report, with sections dedicated to the presentation of the case, discussion, and conclusion. The inclusion of relevant figures and references further enhances the clarity and comprehensiveness of the manuscript.</p> <p>Based on the information provided, the manuscript appears to be scientifically correct. The authors have presented the case details, diagnostic findings, surgical management, and pathological results in a clear and logical manner. The discussion section provides a comprehensive analysis of the case, drawing upon relevant literature and guidelines.</p> <p>The references cited in the manuscript are generally sufficient and relatively recent.</p>	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> Is language/English quality of the article suitable for scholarly communications? 	<p>The language/English quality of the article is suitable for scholarly communications. The article is well-written, clear, and free of grammatical errors. The vocabulary used is appropriate for a scientific article, and the sentences are well-structured and easy to follow. Overall, the language quality is of a high standard, making the article accessible to a broad audience of researchers and clinicians in the field of gastrointestinal surgery.</p>	
<p>Optional/General comments</p>
