

Editor's Comment:

Title Effect of different spacing and NPK combination on plant growth, fruit yield and fruit quality of strawberry (*Fragaria x ananassa*) cv. Winter dawn.

Journal of Advances in Biology & Biotechnology

In addition to the revision comments I found the following.

- Article title need to change to "Future perspectives, strategies and Interactions of Molecular mechanisms and cytopathology of Phytophthora" to be more suitable.
- The topic of the article is important for strawberry farm owners, as it has become a major source of income for farmers.
- The author needs to reformulate the abstract with more details and indicate the obtained results if present.
- The authors need to reformulate and expand the introduction and support it with modern references related to the aim of the study after remove the part with red color in text.
- This article lacks the correct scientific method followed in such studies, especially there is no the materials and methods used.
- The author did not address basic scientific methods about plants and plant diseases in general.
- The author did not record the number of samples and replicates used and not make statistical analysis to link, discuss, and review the results with other studies.
- Article did not include results specific to this study, and therefore there is no discussion of the treatments used, as there is no scientific basis to indicate the best of these treatments to increase flower and fruit quality, increase the yield of each plant and also profitability.
- References are not sufficient for cover the topics related to plants and plant diseases so authors need to rewritten and add modern references.
- References Kumar et al. and others as red colors that present in references list but not found in the text.
- The article needs an English language editor to improve the language and basic grammar of the manuscript.
- Authors must strictly adhere to the journal's system in standardizing and writing texts and references.

Decision

This article requires the author to do the following:

-

○ Suggestion for title change as with red color as in text and written above in this decision.

- Do what is required from to mentioned in this decision.

- Rewrite abstract, introduction, methods and discussion.

- The author makes the corrections shown in text as red color.
- The article contains many errors in form and content, including the lack of scientific research methodology and the division of recognized research structures and sections.
- The article did not provide any new scientific addition to the scientific community or even professional agricultural development for farmers.

Thus, according to all of the above, and since this article did not provide any new scientific or professional addition and is full of many scientific and linguistic errors.

I believe that this article is not suitable for publication in this journal.
