

Review Form 1.7

Journal Name:	Journal of Engineering Research and Reports
Manuscript Number:	Ms_JERR_117025
Title of the Manuscript:	The affects of Ce doping Cr2O3 based catalysts supported on Activated carbon for 1,2-dichloroethane abatement
Type of the Article	Original Research Article

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>Yes, the manuscript appears to be important for the scientific community, especially for researchers and practitioners involved in catalysis and environmental chemistry. It presents a comprehensive study on the preparation and characterization of chromium-based catalysts supported on activated carbon for the catalytic combustion of 1,2-dichloroethane (DCE). The use of hydrothermal method, coupled with the addition of cerium (Ce), is highlighted as a means to enhance the physicochemical properties and catalytic activity of the catalysts.</p> <p>YES</p> <p>YES YES</p> <p>YES</p> <p>YES</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Based on the provided excerpt, the language and English quality of the article seem suitable for scholarly communications. The text appears to be well-written and effectively communicates the scientific concepts and findings related to the preparation and characterization of chromium-based catalysts supported on activated carbon.</p>	
<p>Optional/General comments</p>		

Review Form 1.7

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
