

SDI EDITORIAL COMMENTS FORM

EDITORIAL COMMENT'S on revised paper (if any)	Authors' response to editor's comments
<p>There are a lot of grammar and editorial mistakes in the manuscript. Still there are scientific names which are not italic. Gram is a scientist's name. Wherever the word comes it should start with "G". Still materials and methods are not detailed enough. Results are not graphically presented. Author has presented results in a few tables in a careless manner. Instead of tables the author can present results in graphs.</p> <p>Although the author has used statistics none of the results are presented statistically. Sample numbers, number of replicates are missing.</p> <p>Although this study is scientifically important, the author has not conducted the study scientifically.</p>	<p>Grammar revised</p> <p>Correction made</p> <p>Revised accordingly</p> <p>Done revision</p>
