

Review Form 1.7

Journal Name:	International Journal of Medical and Pharmaceutical Case Reports
Manuscript Number:	Ms_IJMPCR_117506
Title of the Manuscript:	Pericardial Effusion as an Early Indicator of Breast Cancer Recurrence: A Case Report and Discussion
Type of the Article	Case Report

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>1. Yes, this manuscript provides valuable guidance for managing pericardial effusion in oncological patients, emphasizing the importance of pericardial effusion as a predictor of cancer recurrence. Researchers and clinicians can benefit from its insight.</p> <p>2. Yes, the title reflects the main conclusion of the article.</p> <p>3. Yes, the abstract is comprehensive and reflects the key points of the article.</p> <p>4. Subsections are aligned with the type of the article which is a case report.</p> <p>5. Yes, the article provides valuable insights about pericardial effusion in patients diagnosed with breast cancer and its diagnostic significance for recurrence of breast cancer.</p> <p>6. Major part of references are recent.</p> <p>Additional comments :</p> <p>1. CT Scan Images: The manuscript could benefit from including relevant CT scan images of the patient. These images would enhance the visual understanding of the pericardial effusion and its relationship to breast cancer recurrence. If available, consider adding them to the manuscript.</p> <p>2. Breast Cancer Subtype: It's essential to provide information about the subtype of breast cancer in the patient. Specifically, whether the breast cancer is HER2-positive or not. Including this detail in the discussion section would enhance the clinical context and inform treatment decisions.</p>	Y
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>The article is well-written and the English quality of the article appears commendable.</p>	
<p>Optional/General comments</p>
