

Review Form 1.7

Journal Name:	Journal of Advances in Medicine and Medical Research
Manuscript Number:	Ms_JAMMR_115843
Title of the Manuscript:	Impact of the COVID-19 Pandemic on Cervical Cancer
Type of the Article	

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>Cervical cancer is one of the most prevalent ones, as well as it is cancer that could be diagnosed early through a well established prevention process Thus the effects of COVID pandemic on cervical cancer epidemiology represents the perfect paradigm of how COVID pandemic has affected cancer prevention programmes and epidemiology COVID-19 pandemic effect on cervical cancer prevention programmes and disease epidemiology seems more suitable The abstract should represent a presis of the manuscript contains The introduction is too long any references on how COVID-19 has affected cervical cancer epidemiology are lacking Current manuscript is a collation of different parts of various articles. Several parts are duplicated likes the one on CIN significance. I suggest authors should organised the effects of screening reduction in various countries in the main periods of COVID-19 pandemic in different tables and give a summary in the main text perhaps using the available meta-analysis as railroad In another table they could present the effect of sceening abandonment on cancer diagnosis delay and OS. Costs of the pandemic effect may also discussed if any data are available Methodology stion should be omitted Brazilian example should be compared with the reults of similar effortess from other low and middle income countries Role of telehealth could be discussed as well as self screening techniques development Reports on other cancers should be omitted. Lessons from the pandemic would be a marvelous closure Current manuscript is a collage of text duplication from different articles It should be rewritten to become a dissent review article Martins TR, et al. Impact of the COVID-19 Pandemic on Cervical Cancer Screening in São Paulo State, Brazil <i>Acta Cytol.</i> 2023;20 ; 1–7. Wentzensen N, et al. Impact of COVID-19 on cervical cancer screening: Challenges and opportunities to improving resilience and reduce disparities <i>Preventive Medicine</i> 2021;151:106596</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>The language needs generous polishing</p>	
<p>Optional/General comments</p>
