

Editor's Comment:

I carefully analyzed the final paper and the reviewers' recommendations. The reviewers made important recommendations for improving the paper. Unfortunately, the authors did not make these improvements. For example, a referee requests: *Kindly replaced the references that published before 2000.*

From the analysis of the paper, it appears that the most recent reference is from 2017. Since then, 7 years have passed, science has evolved a lot. So the paper is no longer relevant if it is analyzed in relation to old references.

Consequently, the paper is not recommended for publication.
