

Editor's Comment:

I have reviewed the files regarding JERR paper 116285 with title "SVM and RF Based Performance Enhancement in Organization: A Study on KGI, Odisha and its Organizational Growth". I see that the authors, in their second version, have satisfactorily taken into account the referees' comments. I only have one point: authors should standardize the way they reference and put the year of publication of the articles first, as is asked by the JERR Journal, and not last. For example,

15. X. Zhang, Y. Li, and X. Peng, "Brain wave recognition of word imagination based on support vector machines," Chinese Journal of Aerospace Medicine, vol. 14, no. 3, pp. 277–281, 2016

Once that small correction is made, the article can be published.
