

**SDI EDITORIAL COMMENTS FORM**

<b>EDITORIAL COMMENT'S on revised paper (if any)</b>	<b>Authors' response to editor's comments</b>
<p>1. All variables in formulas have to be collectively accompanied by a Table in which the input data of the specific study took place. The formulas cannot stand alone, without data utilized to support the conducted analysis and findings.</p> <p>2. The Conclusions section is an autonomous main section, it cannot be part of section 3. Results and Discussion.</p> <p>In the concluding remarks authors are recommended to succinctly outline the key-aspects and the generalization prospects of their findings, towards similar research contexts worldwide. 2-3 concluding sentences are adequate. Language quality is satisfactory for scientific publication.</p> <p>It can be published if the aforementioned minor revisions.</p>	<p>The said table is included as Table 1. List of variables used in the study.</p> <p>The said correction is made as 4. Conclusion and implications.</p> <p>In this research paper citations are included for key aspects as per editorial comment's</p>
