

Review Form 1.7

Journal Name:	Archives of Current Research International
Manuscript Number:	Ms_ACRI_115891
Title of the Manuscript:	Relationship between beneficiary profile and technological change in pond farming in Jaipur district of Rajasthan
Type of the Article	

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>Yes, however, this still needs some of the improvements particularly in defining the main problem of the study and the results and discussion</p> <p>Exploring the Socioeconomic Dynamics and Technological Adaptation Among Farmers: Implications for Sustainable Agricultural Development and Rural Livelihoods in Jaipur</p> <p>The abstract have not mentioned the main problem of the study</p> <p>This research supposed to follow the IMRAD format to be more readable and understandable , however, this misses to discuss the problem of the study</p> <p>Yes can be considered but needs some improvement- like Clear Research Question or Hypothesis as scientific papers typically begin with a clear statement of the research question or hypothesis that the study aims to investigate. In addition it lacks Methodological Rigor as scientific papers employ rigorous research methods and techniques to collect and analyze data. This includes detailed descriptions of the study design, sampling methods, data collection procedures, and statistical analyses used to interpret the results.</p> <p>References should be 5 years backwards only to make sure that the research is up to date. Some of the references used in the study was conducted as early as 2000.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	Yes	
<p>Optional/General comments</p>
