

Editor's Comment:

The manuscript is interesting but there are some comments:

- 1) As far as I know it is forbidden to repeat the data of Tables in the text and in Figures. See Table 1- all detailed information is given in the text and repeated in Figure 1
- 2) Conclusion again presents the detailed data of the received values. I would recommend to combine the Conclusion section and 'Policy implication' highlighting only the most important conclusions without concrete values.
- 3) it seems that the Discussion should be expanded. May be the authors should include a comparison with other regions of India...
- 3) there are some inaccuracies and misprints in the text- I have indicated the necessary changes with red color.

- 4) what is '20:20:0:13'- may be it should be 'N20:P20:K13'???
