If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>Yes. It is different aspect of research. Methodology is unclear as some of the variables are ignored in this study, however it is important for scientific community.</p> <p>Yes</p> <p>Suggestions given as comments in manuscript.</p> <p>The subsections are not appropriate. Quantitative data is insufficient. No qualitative data incorporated. The discussion is also too short to elaborate the topic. It is scientific writing and it should be written logically and in a sequence and style as per international standards for scientific writing. The results show non significant difference between the production of adopters and non adopters which needs to be justified scientifically. References are more than 10 years old. The reference writing style is not in accordance with the journal's style.</p> <p>The article needs to be thoroughly revised before publishing.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Writing language is below average.</p>	
<p>Optional/General comments</p>	<p>Acceptable with major revisions</p>
