PART1:ReviewComments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>1. Yes, this manuscript is important for the scientific community as it highlights a critical issue regarding food waste management and its impact on the environment. The paper sheds light on the significant contribution of food waste to greenhouse gas emissions, emphasizing the urgent need for better waste management practices to mitigate climate change and preserve environmental health. By emphasizing the importance of recycling, composting, and other initiatives, the manuscript offers practical solutions to address this pressing issue and encourages policymakers to enact regulations for effective waste management strategies. Overall, the manuscript serves as a valuable resource for researchers, policymakers, and stakeholders striving towards a more sustainable future.</p> <p>2. The title "Management of food waste and landfill, a priority towards reducing the carbon footprint and a sustainable environment" effectively conveys the main topic of the article. Here are a few suggestions: Cutting Carbon: Prioritizing Food Waste Management for a Greener Tomorrow Beyond Landfills: Strategies to Shrink our Carbon Footprint through Food Waste Reduction</p> <p>3. Yes, the abstract of the article effectively highlights the key points regarding the impact of food waste on environmental pollution, particularly through landfill disposal. It outlines the connection between food waste, greenhouse gas emissions, and climate change, emphasizing the need for better waste management practices. Additionally, it suggests that initiatives such as recycling and composting should be encouraged to mitigate these environmental risks. Finally, it underscores the importance of implementing regulations to address the issue effectively. Overall, the abstract provides a comprehensive overview of the article's focus on food waste management and its implications for environmental sustainability.</p> <p>4. Yes</p> <p>5. Yes</p> <p>6. Yes, the references in the manuscript are appropriate, and sufficient</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Yes</p>
