

**Editor's Comment:**

I have gone through all the files shared and believe that the revised paper is still not suitable for publication in your esteemed journal.

1. There are many spelling and grammatical errors throughout the paper. Formatting is poor.
2. It is not satisfactory from Language aspect also. Title is also not framed correctly.
3. SEM model has not been explained properly and the Diagram of the model is also not shown.
4. Conclusion is not appropriately written.

Overall, I find that paper is not suitable for publication in the current format.
