

Review Form 1.7

Journal Name:	International Journal of Plant & Soil Science
Manuscript Number:	Ms_IJPSS_117013
Title of the Manuscript:	Effect of irrigation regimes and nitrogen levels on physiological growth parameters of ryegrass
Type of the Article	Original Research Article

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>1. Yes, because ryegrass is one of quick yielding and quality forage specifically for dairy industry and provide feed during winter where feed shortage is a problem</p> <p>2. Yes</p> <p>3. Yes, abstract is comprehensive</p> <p>4. Yes, subsections and structure of the manuscript is appropriate</p> <p>5. Yes, is scientifically correct</p> <p>6. 90 percent of the references are older than 10 years, recent information must be cited</p> <p>Methodology is not detailed, no were mentioned the amount of irrigation applied is not specific. The conclusion of this manuscript is poor, its need improvement</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Yes.</p>	
<p>Optional/General comments</p>	<p>The finding of the manuscript is obvious, and no additional or new information will be produced by this manuscript. its common that high irrigation and Nitrogen application will have positive effect on plant growth, which include leave, stems and etc. therefore recommend the inclusion of 50kgN level as it is standard for optimal performance of ryegrass and most of crops.</p>
