Observations:

01) The title of the article is appropriate to the research works and results.

02) Reviewers' comments are appreciated. The comments raised by the reviewer help improve the quality of the publication.

03) In recent times, most of the watersheds across the globe have suffered from soil degradation, soil erosion problems, and low soil fertility. The results of this article are certainly helpful in improving soil-related problems.

04) The manuscript is well-written, organized, and statistically proven.
