

**Editor's Comment:**

1. Perused.
2. The author has not given satisfactory rebuttal to all the observations of the reviewer.
3. The revised manuscript still has following anomalies:-
  - a) Abstract is not as per the standard format of objectives, materials and methods, findings, conclusions and key words.
  - b) The main article should have objectives, period of study, and limitations.
  - c) The conclusion needs to be paraphrased and to the point.
  - d) The recent references have been added as a tail piece.
  - e) Overall, the article needs to be altered to make it reader friendly.

In view of the above NOT APPROVED, in the present form.
