

Editor's Comment:

Upon careful perusal on the revisions made by the author/s from the comments of the blind reviewers, I hereby recommend the acceptance of the paper for publication considering the ff.

1. Have the paper subjected to stylistics and editing and grammar checking. There were also inconsistencies in the style and format. There were several words without spaces making the sentences unclear and erroneous. Example: Davis et al. on Technology Acceptance model.
2. For the statistical tables, the name of headings should be first letter capital, bold and centered. Instead of 't' put t-value, etc. All these can be addressed during the editing process.
3. Majority of the references are outdated. Ensure 75% and 25% distribution for new and old literatures respectively.
4. Title: instead of saying graduate and undergraduate students'.... just state students'..... The samples can just be described in the manuscript that it refers to both graduate and undergraduate.
