

Review Form 1.7

Journal Name:	Asian Journal of Environment & Ecology
Manuscript Number:	Ms_AJEE_116532
Title of the Manuscript:	Lake Chapala: Water Quality and Ecological and Health Risks
Type of the Article	Original Research Article

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>Yes, since water quality is so important to human life, but many research about water have been done, so what new ideas is this research bringing on board</p> <p>The title looks to much open, it can be screened to specific aim of the study “Assessment of water quality, ecological and heath risks of inland water bodies in Mexico: A case study of Lake Chapala”.</p> <p>The author may not directly write the breakdown in abstract as; objectives, results, design, etc. I infer the author to write the abstract following; aim, significance of study, duration of the study including parameters assessed, methods used, results, conclusion and possible recommendations (these to be written in one paragraph without breakdowns but with a chronological flow order that allows the reader to identify the flow)</p> <p>Some need to be combined, the background and introduction section seemly refer to one section and therefore can be merged, let this section be structured from global scale to study area level in an inverted triangle format.</p> <p>Yes, with minor errors that can be attended to.</p> <p>They are sufficient but some seem to be written in APA style, which is not the format for this journal</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>		
<p>Optional/General comments</p>
