The manuscript designed to study the effect of Sulphur on Radish seed production with and without organic compounds. Being one of the important components in Agriculture Sulphur play significant role in crops. Author has systematically conducted the experiment on how optimum use of Sulphur can maximize the seed production of Radish and reduces the excess seed rate during sowing. The experiment was executed scientifically and obtained results can be utilized further to conduct more research to understand the molecular basis of these interactions. However, few minor corrections have been suggested and reference to be added. 2. Title is appropriated 3. Yes with minor revision 4. Yes with minor revision 5. Yes 6. Yes | |
