

Review Form 1.7

Journal Name:	Asian Journal of Research in Zoology
Manuscript Number:	Ms_AJRIZ_116820
Title of the Manuscript:	The Effect of Purwoceng Extract on the Etawa Crossbreed Bucks Mating
Type of the Article	Original Research Article

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>The paper "The Effect of Purwoceng Extract on the Etawa Crossbreed Bucks Mating" is very useful research that analyses the impact of purwoceng extract on goat mating.</p> <p>The paper is important for the scientific community, but also for practitioners because it helps to design directions of action in research and practice, in particular, regarding the effects of purwoceng extract on goat mating.</p> <p>I mention that the topic is of great importance because the research has shown that it offers many opportunities for growth, development and improvement of businesses, including as a result of the detection and quantification of purwoceng extract on goat mating. Following the analysis of the impact of the influence of integration, agility and innovation, but also in the chain of zootechnical activities on the performance of the animal species, opportunities for business development in this field may result.</p> <p>The title of the paper is appropriate to the research carried out because the paper details the aspects related to the impact of detection and quantification of purwoceng extract on goat mating, which can lead to superior performance of the breed for studied animals.</p> <p>The abstract of the paper presents the important elements of the research carried out, which mainly concern the factors influencing the impact of purwoceng extract on goat mating.</p> <p>We value capacity analysis to identify and design an effective utilization management strategy of how adaptation strategies influence the impact of purwoceng extract detection and quantification on goat mating between Etawah goats in India and Kakang goats.</p> <p>The overall objective of the research focused on an in-depth analysis aimed at studying the detection and quantification of purwoceng extract on goat mating between Etawah goats in India and Kacang goats and the resulting effect.</p> <p>The research reveals the importance of analysing the factors that influence the performance of the results obtained in terms of good quality feed, especially in order to achieve the proposed goal, motivating enough to run and increase business further.</p> <p>The structure of the paper and its subsections are in a sequential sequence and lead to the presentation of research results.</p> <p>I appreciate that research needs to be based, in addition to cost-benefit analysis, on risk behaviour, with the analysis of the impact of innovative, efficient and effective strategies of operations and organizations to preserve their best solutions and the role that policies in the field play in business flows, which requires an adequate approach from a scientific and practical point of view.</p> <p>The study was also based on a series of own analyses based on specialized literature, and during the scientific approach, the opinions of analysts, researchers, experts and professionals in the field were called upon and important approaches from the specific literature in the field, references and appropriate bibliographic sources were indicated.</p> <p>The research was based on appropriate data collection and analysis methods performed by administering different doses of purwoceng extract to Etawa crossed chickens and then observing mating with Etawa crossed deer. Treatment administered was administration of purwoceng extract in amounts P0 (0 mg), P1 (400 mg), P2 (800 mg) and P3 (1400 mg).</p> <p>Therefore, the research carried out is important because it reveals that it contributes significantly to the field of knowledge through the way in which the impact of cost-benefit analysis has on the decisions of breeders of good quality animals, but also on the influence of the integration, agility and innovation of the production chain on the performance of the livestock sector and traders. The concepts are particularly significant as they underline how important it is to perceive research and continuously review advances in research-specific practices in the context of increasing global demand for the potential of aggregation based on determining and investigating the role of integration, agility and innovation of the livestock chain in the performance of companies in the livestock, agricultural and especially food sectors.</p> <p>We believe that it is important to have a risk behaviour but also to analyse the impact of innovative, efficient and effective strategies of operations and organizations in order to preserve the best solutions and the role that policies in the field play. This helps to support the increase in</p>	

Review Form 1.7

	business efficiency, their inherent sustainability and harmony, in particular to ensure the development of businesses, including other industries.	
Minor REVISION comments		
1. Is language/English quality of the article suitable for scholarly communications?		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
