<p><b>Minor</b> REVISION comments</p> <ol style="list-style-type: none"> <li><b>Is language/English quality of the article suitable for scholarly communications?</b></li> </ol>	<p>I would like to thank firstly the editor for the invitation and secondly the authors for the research carried out. The authors clearly explain the importance of Groundnut production in India and the importance of soils with adequate calcium, which explains the objective of the research with Dolomite. The study is well structured, from the introduction documented in bibliography about the objective of the study, to the methodology that allows us to see how it was done in 2019, to the results based on Tables and a conclusion that, without repeating the previous results, clearly summarizes the results.</p>
