

Review Form 3

Journal Name:	Asian Journal of Pediatric Research
Manuscript Number:	Ms_AJPR_125033
Title of the Manuscript:	Child with Non-Syndromic Lambdoid Craniosynostosis:A rare presentation
Type of the Article	Case report

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This study is valuable for the literature because it presents a rare childhood disease. I like this manuscript, because, as an orthodontist, when patients with these anomalies come at an older age, it is important to know the characteristics of the anomaly in order to make the correct diagnosis and treatment plan.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes, it is suitable	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Yes, it is comprehensive	
Are subsections and structure of the manuscript appropriate?	Yes, they are appropriate	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	I think, it would be good to include initial photographs that are relevant to the diagnosis in the article. Also, more information should be given about the post-operative period and more x-rays, photographs, etc. related to the post-operative period should be added.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Yes, they are sufficient and recent	
Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	Yes, it is suitable	
Optional/General comments	The manuscript will be more valuable with the addition of more data as I mentioned above. It can be published after corrections are made. This study is valuable for the literature because it presents a rare childhood disease. I like this manuscript, because, as an orthodontist, when patients with these anomalies come at an older age, it is important to know the characteristics of the anomaly in order to make the correct diagnosis and treatment plan. I think, it would be good to include initial photographs that are relevant to the diagnosis in the article. Also, more information should be given about the post-operative period and more x-rays, photographs, etc. related to the post-operative period should be added. The manuscript will be more valuable with the addition of more data as I mentioned above. It can be published after corrections are made. Best Regards
