Title of the Manuscript:	Infant Food Flours Made From Local Products To Combat Acute Malnutrition In Children Under 5 Years Old In Côte D'ivoire
Type of the Article	Research article

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	Acute Malnutrition is a significant global issue. Always wise to tackle the issue with available products of that specific region which is suitable for the body constitution of People of that particular region. Understanding the composition of macro and micro-nutrients of the local products is important for the scientific community which is comprehensively dealt in this manuscript.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Abstract is comprehensive.	
Are subsections and structure of the manuscript appropriate?	Subsections and structure of the manuscript are appropriate. Please mention which millet was used. On what basis these locally available products were chosen. If any clinical study of these products are included it would add value. Need to mention about affordability and shelf life of the infant food flour.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	Detailed study on Physico-chemical, biochemical, nutritious, and functional characteristics of infant food formulas is appreciable. It is explicit that the value of nutrients required for children are fulfilled with this formula. Along with the nutritional values, the anti nutritional components are also studied.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	References are sufficient. If references of clinical studies are included, it would add immense value.	
Minor REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	Yes	
Optional/General comments
