

### Review Form 3

Journal Name:	<a href="#">Asian Journal of Soil Science and Plant Nutrition</a>
Manuscript Number:	Ms_AJSSPN_125047
Title of the Manuscript:	Nutrient Management with Nitrogen Based Formulations for Enhanced Growth and Yield in Fodder Sorghum ( <i>Sorghum bicolor</i> (L.) Moench)
Type of the Article	

#### **PART 1:** Review Comments

<b>Compulsory</b> REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	I found this article of extreme importance and relevance in the present context. We just observed 2023 as the "International Year of Millets" and it is just apt that this study on sorghum-the king of millets is being conducted.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Yes	
Are subsections and structure of the manuscript appropriate?	Yes	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	Millets-the unsung hero among crops have always been neglected. Majority of the research & study has been based on the conventional crops like paddy, maize etc. More such study on millets are needed whether they are for human consumption or for fodder purpose.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Yes	
<b>Minor</b> REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	The quality of English is quite commendable	
<b>Optional/General</b> comments	Even though the study is based on the "Growth & yield parameters of Sorghum", a brief summary of the soil properties after the experiments, need to be presented, since the same set of properties (including pH) before the treatments have been tabulated.	

**Review Form 3**

**PART 2:**

	<b>Reviewer's comment</b>	<b>Author's comment</b> <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
