Manuscript Number:	Ms_JAMMR_125181
Title of the Manuscript:	Odontogenic myxoma with reconstruction with customized prosthesis: Clinical Case Report
Type of the Article	Case report

Review Form 3

PART 1: Review Comments

<u>Compulsory</u> REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<p>Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.</p>	<p>Odontogenic myxoma although rare, but it is known for its locally aggressive nature. Young age females are having more predilection. This case report has mentioned about the management of an extensive lesion of odontogenic myxoma of lower jaw with minimal post operative aesthetic and functional disturbances.</p>	
<p>Is the title of the article suitable? (If not please suggest an alternative title)</p>	<p>Repetition of the word 'WITH' two times in the title found to be little unattractive. Management of odontogenic myxoma of lower jaw -A case report</p>	
<p>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</p>	<p>In first paragraph since the author is mentioning the general management- it's better to write "The treatment of choice is surgical resection of the lesion and reconstructive surgery." (Don't mention mandible) Third paragraph - literature says mandible is more commonly affected than maxilla</p>	
<p>Are subsections and structure of the manuscript appropriate?</p>	<p>Yes</p>	
<p>Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.</p>	<p>OM is more commonly seen in mandible than maxilla. (Author has mentioned opposite) Manuscript has mentioned about the management of an extensive lesion involving condyle and the reconstruction of the affected condyle and mandibular region without disturbing the aesthetic and function. Author has also mentioned the follow up of the case.</p>	
<p>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. :</p>	<p>Yes</p>	
<p><u>Minor</u> REVISION comments Is the language/English quality of the article suitable for scholarly communications?</p>	<p>In discussion -2nd paragraph 2 nd line instead of OM author mentioned MO Radiographic appearance of the lesion as Sunray appearance can be included as an image For understanding the extensiveness of the lesion if possible add axial /coronal section of the CT</p>	
<p><u>Optional/General</u> comments</p>
