### Review Form 3

#### **PART 1: Review Comments**

<b>Compulsory</b> REVISION comments	<b>Reviewer's comment</b>	<b>Author's Feedback</b> (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	It is well known that cancer has become one of the major health problems. The role nutrition along with the medicine is very important. So, in this point of view this is very important research. But, the selection of the Experts was not given in the manuscript, so, it should clearly be mentioned in the manuscript.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Follow the Author's Guideline.	
Are subsections and structure of the manuscript appropriate?	Discuss should be incorporated	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The early introduction of PN for treatment of cancer patients may be the important message of this research.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. :	<b>Some more recent citation should be added.</b> "However, in practice, the daily calorie requirement of a patient undergoing cancer treatment is not calculated at almost 80 to 85% of centers in the country." Give Reference. "The expert panel opined that among public hospitals in India, it was estimated 50 to 60% of patients with cancer are screened for malnutrition and close to 20% of hospitals have no dietician." Give Reference. Many hospitals with more than 100 beds have only one dietician." Give Reference.	
<b>Minor</b> REVISION comments  Is the language/English quality of the article suitable for scholarly communications?		
<b>Optional/General</b> comments	In the manuscript, it was mentioned that there are several challenges for use of PN in India. But the opportunities or the process of mitigation was not mentioned. It may be focused.
