Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<p>Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.</p>	<p>This manuscript is vital for the scientific community as it addresses the pressing public health issue of parasitic zoonoses, which pose significant risks in Sri Lanka and other regions with similar climates and socio-economic conditions. By reviewing various zoonotic parasites and their transmission pathways, it contributes valuable insights into how these infections impact both human and animal health. I appreciate the manuscript's emphasis on preventive strategies, as it offers practical, evidence-based solutions that can guide public health initiatives, especially in underserved areas. However, more focus on emerging zoonotic diseases could enhance its relevance given global health trends.</p>	
<p>Is the title of the article suitable? (If not please suggest an alternative title)</p>	<p>Yes</p>	
<p>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</p>	<p>Please add methods and conclusion</p>	
<p>Are subsections and structure of the manuscript appropriate?</p>	<p>Yes but need to add methodology in the abstract</p>	
<p>Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.</p>	<p>This manuscript appears to be scientifically robust and technically sound due to its comprehensive review of parasitic zoonoses in Sri Lanka, supported by relevant data and studies. It employs a systematic approach to evaluating the epidemiology, transmission mechanisms, and public health impacts of various zoonotic parasites, ensuring a balanced analysis of current scientific knowledge. The inclusion of both qualitative and quantitative research, alongside preventive strategies rooted in evidence, adds to the technical accuracy of the manuscript. Furthermore, its reliance on peer-reviewed sources and up-to-date information underscores the credibility of its findings, making it a reliable resource for public health professionals.</p>	
<p>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</p>	<p>Yes</p>	

Review Form 3

Minor REVISION comments Is the language/English quality of the article suitable for scholarly communications?	Suitable	
Optional/General comments	<ol style="list-style-type: none">1. Need to add a comprehensive conclusion at the end2. From section 2.6 to 2.7.7. there is no intext citation and need to be added3. In second paragraph of 2.3, there is no citation.4. In first paragraph of 2.4, there is no citation.5. In 2.2 also there is no citation6. In introduction, at least need to write a full paragraph7. It is compulsory to make a table of zoonotic diseases and research done on this in Sri Lanka. The reader can easy know the data.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
