

Review Form 3

Journal Name:	Asian Journal of Fisheries and Aquatic Research
Manuscript Number:	Ms_AJFAR_125157
Title of the Manuscript:	The Effect of Feeding Different of Small Fish Feed on the Growth and Survival of Mangrove Crabs (<i>Scylla serrata</i>)
Type of the Article	Application based.

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The importance of this study is quite very impressive concerning minimal requirements in production. This scientific research tries to explore the part where minimal food results in maximum production along with no wastage of food. Which is a very opportunistic challenge for present-day research.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title is suitable but there is a problem with the sentence construction of the title, please check that issue.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Yes, except another line requires for a justification of the last line "Water quality.....cultivation." And the sentence construction of the sentence "The conclusion of the study can be concluded....."	
Are subsections and structure of the manuscript appropriate?	Yes.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	In the materials method, and tools used section please clearly mention the usage of those tools and their model number. In the materials method part, please concentrate on the sentence construction otherwise it's difficult to understand as it is scientific research. Mention the washing material with the help of which crab boxes are washed. Write down the importance of mixing seawater and fresh water and the predetermined salinity level. One line for why females are avoided for experimental study. In the discussion part, the analysis of results is also included, if possible separate those as in this paper those are in separate parts.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Yes. For water quality parameters give the references of those literature as those are the descriptively taken.	
<u>Minor</u> REVISION comments Is the language/English quality of the article suitable for scholarly communications?	Some mistakes in sentence construction.	
<u>Optional/General</u> comments	The experimental study and analytical parts are good. It will be much more appropriate if there is a control setup along with the experimental setup. And please concentrate on sentence construction issues to understand the meaning properly.
