PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The study was undertaken to determine costs, returns and profitability in vegetable production of a sample of 90 vegetable cultivators of three tahsils of Palghar viz. Vasai, Palghar and Dahanu during 2023. However, this paper's method is too simple. It only describes statistics and does not use the statistical tools commonly used in regression analysis, reducing this paper's research value.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Yes	
Are subsections and structure of the manuscript appropriate?	Partly. It is suggested that the authors add a literature review chapter so that readers can understand this topic's importance and research value.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	This study methodology and results may be revised by taking, for some suggestions and questions, the following comments below: First, the authors break down the costs to better understand the production costs. However, the authors should analyse this cost decomposition in more depth. For example, which one is the main factor driving up costs? Second, it is suggested that the authors use statistical tools for further analysis, such as multivariate statistics, regression analysis, etc.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Partly. I don't know whether the author's reference format meets the specifications of this journal, such as [1]-[3] Anonymous (2023).	
Minor REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	Yes
