

### Review Form 3

Journal Name:	<a href="#">Journal of Scientific Research and Reports</a>
Manuscript Number:	Ms_JSRR_123763
Title of the Manuscript:	<b>A review on contribution of organic farming practices to soil structure and crop performance</b>
Type of the Article	<b>Review Article</b>

#### **PART 1:** Review Comments

<u>Compulsory</u> REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<b>Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.</b>	This manuscript provides a comprehensive review of organic farming practices, their impact on soil structure, and crop performance. Its emphasis on sustainability and biodiversity is crucial for addressing contemporary agricultural challenges. I appreciate its balanced view of the benefits and challenges of organic farming, particularly how it contrasts with conventional methods. The discussion on the long-term environmental benefits makes it a valuable contribution to the scientific community.	
<b>Is the title of the article suitable? (If not please suggest an alternative title)</b>	The title is appropriate as it clearly reflects the content and scope of the article. However, an alternative suggestion could be: "The Role of Organic Farming in Enhancing Soil Structure and Crop Performance: A Comprehensive Review."	
<b>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</b>	The abstract is comprehensive and covers the essential aspects of the manuscript. However, it could benefit from a clearer mention of the specific challenges in organic farming (e.g., yield gaps and economic viability). Including a brief statement about the potential future directions of organic farming innovations could further enhance the abstract.	
<b>Are subsections and structure of the manuscript appropriate?</b>	The manuscript's structure is well-organized. The clear division into sections such as soil health, crop performance, and the comparison between organic and conventional farming makes the content easy to follow.	
<b>Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.</b>	This manuscript is scientifically sound, as it draws from a wide range of credible studies and references. The explanations of soil structure, nutrient cycling, and organic farming techniques are thorough and based on established research. Its comprehensive review of organic farming's environmental benefits and the challenges involved makes it a technically robust piece of work.	
<b>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</b>	The references are sufficient and recent, covering relevant literature up to 2021. I do not see any significant gaps in the literature review, but if available, adding more recent studies (from 2022 or later) could further strengthen the paper.	
<u>Minor</u> REVISION comments <b>Is the language/English quality of the article suitable for scholarly communications?</b>	The language quality is appropriate for scholarly communication. However, there are minor grammatical issues and some sentences could be restructured for better clarity.	
<u>Optional/General</u> comments		

### Review Form 3

#### **PART 2:**

	<b>Reviewer's comment</b>	<b>Author's comment</b> <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
