

Review Form 3

Journal Name:	Archives of Current Research International
Manuscript Number:	Ms_ACRI_125329
Title of the Manuscript:	Artificial Intelligence and Global Security: Strengthening International Cooperation and Diplomatic Relations.
Type of the Article	Research Articles

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.		
Is the title of the article suitable? (If not please suggest an alternative title)		
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.		
Are subsections and structure of the manuscript appropriate?		
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.		
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. :		

Review Form 3

<p>Minor REVISION comments</p> <p>Is the language/English quality of the article suitable for scholarly communications?</p>		
<p>Optional/General comments</p>	<p>Summary: The study looks into how diplomatic ties and international cooperation might improve global security via artificial intelligence (AI). It draws attention to AI's dual nature, which presents ethical and geopolitical issues in addition to operational gains in fields like cybersecurity and military accuracy. The study, which employs a mixed-methods approach, highlights the possibility for global cooperation and moral AI governance while identifying important concerns, such as geopolitical conflicts and fragmented governance. Results show advances in AI-driven cybersecurity, but the need for strong governance is highlighted by a rise in AI-related assaults. The study comes to the conclusion that maximising AI's potential in tackling global security concerns requires cultivating international trust and cooperation.</p> <p>Major Comments The paper has a clean, well-organised layout, with sections that flow naturally from the introduction to the conclusion. The reader is guided through the research emphasis by the explicit objectives.</p> <p>The research is strengthened by the addition of quantitative data on attack incidences and cybersecurity advancements driven by AI. The arguments presented throughout the text are supported by this empirical data.</p> <p>It is admirable that the OECD AI Principles and the Global Partnership on AI have been examined as examples of current governance attempts. It may be improved, though, by providing more detailed suggestions on how to develop or expand these frameworks.</p> <p>Improvement Needed: Case Studies: Including case studies or illustrations of effective AI governance projects could bolster the claims made and show that the suggested ideas are workable.</p> <p>Decision Accepted Strongly</p>	

PART 2:

	<p>Reviewer's comment</p>	<p>Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</p>
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
